

K9

Making payment functions more powerful

K9 is the most advanced and sophisticated smart payment terminal based on Android 8.1. It is designed to support all types of payment methods, including mag-stripe, chip card, contactless and QR code payment. With its powerful communication capability and optional accessories, integration to other systems is seamless.

The 5.5-inch high definition color touch display enables the operator to perform transactions more easily with signature capture capability. In addition, as it is based on the Android platform, adding other value-added applications is simple. K9 will provide a new type of payment experience to your customers.
